

### **Policy 133: Wiring Certificate**

Board Approved: October 25, 2023

*Clayton Monsen*

---

Board President

---

**Purpose:** To provide guidelines for the connection of services and to inform a potential or existing member that energy shall not be furnished until all criteria are met.

**Provisions:**

- 1) At the time a request for service is made, the applicant shall agree to have the electrical contractor furnish McKenzie Electric Cooperative, Inc. (MEC) with the Utilities Copy of the Electrical Board Wiring Certificate with only the basic information and signed by the contractor. This will be done before service is energized.
- 2) If the applicant wishes to do his/her own wiring, he or she shall contact the State Electrical Board and inform them that a self-installation was performed. A wiring certificate must be issued prior to MEC energizing the service.
- 3) For any modification to an existing service, MEC may request a current wiring certificate.
